PRINT OR COATING BASE FABRICS

A large range of fabrics, constructed from natural fibres, man-made fibres and blends, are available either bleached or scoured. Fabrics are produced virtually fault free and pre-stretched to provide an extremely stable foundation for further processing. Weights range from 70gsm to over 600gsm with useable widths of 60cm to 280cm.

RUBBERISING FOUNDATION FABRICS

Weller specialise in the production of foundation fabrics for the rubberising industry. Bleached or scoured, fabrics are produced virtually fault free and pre-stretched to provide an extremely stable foundation for further processing.

A wide range of weights and constructions can be produced, many to the customers unique specification, for end uses including classic raincoat manufacture, printing blankets and rubber component re-enforcement.

BESPOKE/ CUSTOMER SPECIFIC FABRICS

Weller specialise in cellulosic fabrics, and cellulosic blends with weights ranging from 70gsm up to 970gsm for our heaviest canvas. Typically we weave fabrics with a high, or very high, pick density for highly consolidated fabrics but we also have experience of open, loose, constructions for specific end uses.

Other uses include:

- Apparel fabrics
- Art fabrics
- Composites, fabrics for impregnation.
- Domestic fabrics, dishcloths etc.
- Engineering fabrics
(coated for engineering uses)
- Industrial Belting
- Luggage fabrics
- Printing canvas
- Sail canvas

Other Specialisms

2.2.8 PAPER RE-ENFORCEMENT

Weller both weave and bond fabrics to paper for re-enforcement or aesthetic purposes. Paper can be sourced by Weller or supplied by the customer.

End uses include:

- Abrasive papers
- Book binding
- Display materials
- Packaging materials
